Professional Summary

AI/ML Engineer specializing in end-to-end model development, experimentation, and performance optimization on real-world datasets. Strong expertise in the ML lifecycle including data preprocessing, feature engineering, model training, evaluation, and deployment support. Hands-on experience with AutoML, AI-driven automation, and predictive modeling, delivering scalable solutions and actionable insights.

Technical Skills

Machine Learning & AI: Machine Learning Algorithms (Regression, Classification, Clustering), Model Evaluation, Hyperparameter Tuning & Performance Optimization, Feature Engineering & Data Preprocessing, Time Series Forecasting, AutoML & Model Experimentation, ML Lifecycle

Libraries & Frameworks: scikit-learn, TensorFlow, PyTorch, NumPy, Pandas, OpenCV

Programming & Data: Python, SQL, Data Structures & Algorithms

Generative AI: LLMs, Prompt Engineering, AI Chatbots, RAG (basic), Hugging Face

Tools & Platforms: Jupyter Notebook, Git/GitHub, Flask, Streamlit, Power BI, Tableau

Experience

AI/ML Engineer Intern

Oct 2025 - Present

Farmseasy Tech Solution Private Limited

- Built and optimized machine learning models for predictive use cases on large-scale structured datasets.
- Performed data extraction using SQL and data preprocessing, feature engineering, and transformation to ensure high-quality model inputs.
- Conducted model evaluation, hyperparameter tuning, and performance optimization to improve accuracy and robustness.
- Worked with structured and unstructured datasets, supporting real-world machine learning applications.
- Collaborated with cross-functional teams to translate business problems into scalable ML solutions, following best practices in data governance and responsible AI.

AI and Cloud Intern

Jul 2025 - Aug 2025

IBM SkillsBuild (Edunet and AICTE)

- Utilized AutoAI (IBM Cloud) to generate AutoML models, enabling rapid model development without manual coding.
- Conducted model experimentation and comparison across multiple algorithms to identify optimal solutions.
- Developed a no-code agentic AI chatbot using AutoAI and prompt engineering for automated query handling.
- Built AI-driven workflows for data preprocessing, analysis, and insight generation.
- Documented experiments, model performance, and learnings while working with AI/ML platforms for scalable model development.

Projects

NeuroScan AI – Brain Tumor Detection System

- Developed a deep learning model using VGG16 transfer learning for multi-class MRI image classification (glioma, meningioma, pituitary, no tumor).
- Performed data preprocessing, augmentation, and feature extraction to improve model generalization and robustness.
- Achieved 92% accuracy through model evaluation, hyperparameter tuning, and performance optimization techniques.
- Deployed the model via a Flask-based web application with REST APIs, enabling real-time image upload and prediction.
- Designed an end-to-end ML pipeline covering data preparation, model training, evaluation, and deployment with real-time inference.

Electric Vehicle Sales Forecasting

- Developed a time-series forecasting model (SARIMA) to predict EV sales (BEV & PHEV).
- Performed data preprocessing, transformation, and time-series feature engineering for accurate model input preparation.
- Trained and evaluated models with parameter tuning and performance validation, ensuring forecasting accuracy and robustness.
- Built an interactive Streamlit application for real-time data visualization and future sales prediction.
- Implemented a model inference pipeline using joblib, enabling efficient deployment and long-term forecasting insights.

Fitness Buddy - AI Fitness Assistant

- Developed an AI-powered assistant using LLM concepts for personalized recommendations.
- Designed prompt engineering workflows to improve response accuracy and relevance.
- Integrated APIs for real-time interaction and automation.
- Explored agentic AI workflows and conversational system design.
- Applied AI techniques for user interaction and intelligent response generation.

Education

B.Tech in Computer Science and Engineering (AI/ML)

2023 – Present

Deogiri Institute of Engineering and Management Studies, Maharashtra

Diploma in Computer Engineering

2020 – 2023

MGM Polytechnic, Maharashtra

Certifications

- Python for Data Science – Cognitive.io
- SQL (Basic) – HackerRank
- Git and GitHub – EXCELR
- British Airways Data Science Job Simulation – Forage
- IBM SkillsBuild AI & Cloud Internship
- Generative AI Mastery Workshop - NXTWAVE
