Professional Summary

Aspiring Data Scientist with hands-on experience in Python, SQL, and machine learning, including regression, classification, and time-series forecasting. Proficient in data preprocessing, exploratory data analysis (EDA), and data visualization using Pandas, NumPy, and Matplotlib. Strong analytical and problem-solving skills with a focus on building data-driven solutions for business insights and decision-making.

Technical Skills

Programming Languages: Python, SQL

Machine Learning: Regression, Classification, Clustering, Random Forest, XGBoost, SVM, PCA

Deep Learning: CNN, RNN, Transfer Learning, VGG16, ResNet

Generative AI: LLMs, Prompt Engineering, AI Chatbots

Frameworks and Libraries: TensorFlow, PyTorch, scikit-learn, NumPy, Pandas, OpenCV

Data & Analytics: Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)

Databases: MySQL, PostgreSQL

Tools: Git, Flask, Streamlit, Jupyter Notebook, Power BI, Tableau

Experience

AI/ML Engineer

Oct 2024 – Present

Farmseasy Tech Solution Private Limited

- Developed predictive machine learning models for agricultural data analysis and crop lifecycle prediction.
- Performed data preprocessing, feature engineering, and statistical analysis on large datasets.
- Evaluated and optimized machine learning models to improve prediction accuracy.
- Collaborated with cross-functional teams to implement data-driven solutions.

AI and Cloud Intern

Jul 2024 – Aug 2024

IBM SkillsBuild (Edunet and AICTE)

- Built AI-driven applications including chatbot systems and automated workflows.
- Conducted exploratory data analysis and machine learning experimentation.
- Implemented machine learning models using Python and evaluated model performance.
- Documented findings and collaborated with mentors during project reviews.

Trainee - Software Design and Development

Jul 2022 – Aug 2022

Modi Innovations Private Limited

- Assisted in software development tasks and application interface design.
- Developed responsive web interfaces using HTML, CSS and .NET.
- Supported implementation of Industry 4.0 based software systems.
- Collaborated with team members during development and testing stages.

Projects

NeuroScan – AI Brain Tumor Detection System

- Built a CNN-based deep learning model using VGG16 transfer learning for MRI image classification.
- Achieved 92% accuracy through data augmentation and model optimization.
- Implemented preprocessing pipelines using OpenCV for medical image analysis.
- Deployed the model using a Flask-based web application for real-time prediction.

Electric Vehicle Sales Forecasting

- Developed a time-series forecasting model using SARIMA to predict EV sales trends.
- Performed data preprocessing, seasonal analysis, and model diagnostics.
- Achieved improved forecasting accuracy compared to baseline models.
- Built an interactive Streamlit dashboard for visualization and forecasting insights.

Fitness Buddy – AI Fitness Assistant

- Built an LLM-powered conversational assistant for fitness guidance and recommendations.
- Implemented prompt engineering techniques to improve response quality.
- Designed conversational workflows for personalized fitness support.
- Optimized inference time for faster chatbot responses.

Education

B.Tech in Computer Science and Engineering (AI/ML)

2023 – Present

Deogiri Institute of Engineering and Management Studies, Maharashtra

Diploma in Computer Engineering

2020 – 2023

MGM Polytechnic, Maharashtra

Certifications

- Python for Data Science – Cognitive.io
- SQL (Basic) – HackerRank
- Git and GitHub – EXCELR
- British Airways Data Science Job Simulation – Forage
- IBM SkillsBuild AI & Cloud Internship
- Generative AI Mastery Workshop - NXTWAVE
